

Add avatar for not comment type comments in WordPress

By default only comment type comments get avatars.

Sometimes I hate you, WordPress. Finding this took 3 hours of my life. In case you want avatars for comments with not "comment" comment type field (for example, you introduce like, favorite, etc. types) you need this to be extended:

```
$allowed_comment_types = apply_filters(
    'get_avatar_comment_types', array( 'comment' )
);
```

php

as

```
add_filter('get_avatar_comment_types',
'add_new_comment_types');

function add_new_comment_types ( $types ) {
    foreach ($this->methods as $method => $type ) {
        if (!in_array( $type, $types ))
            array_push( $types, $type );
    }
    return $types;
}
```

php
