

RE: <http://stream.boffosocko.com/2016/peter-molnar-mentioned-this-post-in-his-article-on-extending>

Chris, I've disabled Pingbacks on my WordPress due to an extensive and annoying amount of spam.

However, I did send a webmention at 2016-03-10 16:01:01, which I've checked now. The response was:

```
error: no_link_found
error_text: The source URI does not contain a link to the
target URI.
code: 400
message: Bad Request
```

This is a problem. The source was <https://petermolnar.net/press-this-indieweb/>, the target was <http://stream.boffosocko.com/2016/sharing-from-the-indieweb-on-mobile-android-with-apps-and> and that URL on my site does contain an href attribute with this exact URL to your site.

Any idea what could have gone wrong?
