

RE: [https://aaronparecki.com/ 2016/07/16/8/](https://aaronparecki.com/2016/07/16/8/)

I recently batch-geotagged photos of mine for the first time ever; I ended up using <http://www.carto.net/projects/photoTools/gpsPhoto/>, it is quite handy.

If you're planning to make an API I suggest you make it gpx compatible; in case you ever obtain anything that is gpx already, it would save you a headache.
