

Autumn fern

NIKON D80, 1/40 sec, ISO 200 | CC-BY-NC-ND-4.0

We visited the very middle of the Peak District in the middle of November, hoping that there are still a few, bright autumn colour trees around - we were wrong. By this time of the year the Peak District is already in the winter state, so instead of photographing autumn trees we ended up photographing what we could. I was using my Jupiter 9 85mm f/2 old, manual, Russian lens.

coordinates: 53.493, -1.825
