

Panorama from Mirador De Morro Velosa

PENTAX K-5 II s, | CC-BY-NC-ND-4.0

When visiting a mirador, one might expect a place to buy coffee next to a magnificent view, but Mirador De Morro Velosa offers a lot more. Besides the panoramic view, the building also functions as a museum about the islands and their origins - and yes, you can still get a Cortado leche v leche.

Since my camera doesn't have a panorama function, I had to improvise: 4 handheld shoots combined perfectly with Hugin turned out better, than I expected.

coordinates: 28.425, -14.058
